Zeiter's Septics Unlimited, Inc. is owned and operated by David & Tammy Zeiter. We are a Full Service Septic & Drain Cleaning Company providing service to eleven counties. We have been in the On-Site Waste Water Management business since 1979 & incorporated the business in 1982 to Zeiter's Septics Unlimited, Inc. We have grown into one of the areas largest septic & drain cleaning companies. We relocated our offices and shop to Morris in June of 2008. This location is a center point to all of the counties we serve. We still have easy access to all of the major highways which is important to us because we are a service based company this allows us to get a crew to a job site quickly. Because we care about the environment, our customers and our profession we are constantly evolving, learning & providing new services. We have over 9500 loyal customers in our database and growing. We always offer discount coupons & money saving games on our web site. We have been giving away a **free** monthly tank cleaning since 2010, over \$15,000 **absolutely free. What has your septic company given back to you?** We attribute our success to the one on one approach of a small family owned business. I personally oversee all aspects of the business.

## OUR STAFF

Our friendly, highly trained, and motivated employees are always ready to serve you. The first persons you will come in contact with are Sarah, Tabitha or Tammy in the office. Tammy is one of the owners of our company. Sarah & Tabitha handle all routing and scheduling of our vacuum trucks, and much of the bookwork. All of our staff can answer any of your questions and get you headed in the right direction. Our office keeps in contact with our men in the field throughout the day. Our field crew are, Jim, Dennis, Mike, Matt, Shaun & Tim and are capable of handling any project they come across. Jim, Mike & Matt do most of the sewage treatment installations. All of our technicians are cross trained so they are capable of performing any job in our line of work. All of our employees are also licensed with the State of Illinois and the local counties for either installing, pumping & transporting Onsite wastewater. Our employee's have the TWIC card, Three Rivers Certified Safety Training, Confined Space Entry Certified as well as local training at various Industrial facilities. We are members of OWPI (Onsite Wastewater Professionals of Illinois) and NAWT (National Association of Waste Transportation) & NOWRA. We have been a member of the Will Grundy Home Builders association for many years. I was just elected as a Board of Directors for OWPI to represent region 7 in Illinois. So, as you can see we are very active in the waste water treatment business, and strive to be as professional as possible.

# ZEITER'S SEPTICS UNLIMITED, INC

Keeping up with technology.

We have some of the newest and most innovative equipment available today for our line of work. This allows us to finish 98% of our jobs in 1 day. By reinvesting and updating our equipment we can meet your needs and keep up with today's rigorous schedules. Our machines are laser controlled for a more accurate and level trench bottom. Not only is our equipment of high quality standards, but we use only the highest quality material. Our 4" piping is schedule 40, which is much stronger than SDR 35 pipe. We use plastic distribution boxes with sealed O-rings, and concrete septic tanks. Also all of our equipment has tracks to eliminate ground compaction. This is a very important point. Soil compaction during site excavation, stock piling of dirt, and backfilling inhibits the longevity of a septic systems life. Smearing of the soil pores, which will happen if a septic system is installed in wet conditions, will also jeopardize the system. We have fabricated side cutter tips on our excavator bucket to eliminate smearing of the sidewalls. We have been installing raised filter beds & pressure dosing systems for years while most of the other installers have chose not to. All of our route tickets, pumping reminder notices, invoices, and scale drawings are computer generated. We also keep accurate records of all tank, and field locations. This has helped many of our clients when doing landscaping, building decks, swimming pools, room additions, etc.. Our best asset is that we are family owned and operated. Now you know what you will receive from our company. Will you receive the same quality and personal care from the other companies? Every business has different overheads. We have the personnel, equipment and knowledge that a Full Service Septic Company should have. There is always someone out there that costs a little less or a little more. But as you can see you will get quality & professionalism with Zeiter's Septics. We are also providing Trenchless Pipelining.

## Full Service Septic & Drain Cleaning Company

We have been around for over 30 years. We have the knowledge and experience to install an onsite wastewater treatment system on your property that will provide you with a long term solution. There is not one system out there that will work on each & every site. You have to stay up on the new technology available. It is like everything else today, it is always changing, evolving & getting better. We excel in this, and welcome all new alternative technology.

We have been the first company several times to install systems that no one else has or even heard of, and have installed some of the largest systems in the state of Illinois. We have had several articles published for the types of systems we have installed. The BioBarrier Membrane system, LPP system (low pressure piping) Ecoflo coco filters, Raised & Subsurface sand filters, Fast & Sybr-Aer Aerobic units and when possible a good old fashion septic tank and field are just some of the systems we have to offer. Zeiter's will tackle any site under any condition, if it can be done we can do it. Once the system is installed, we also have an exact as is drawing and software generated reminder notices that will be sent

## Bottom Line!

We want your business, and we will work hard to keep it. We are a Full service septic & drain cleaning company providing fast, dependable Onsite Wastewater Treatment Systems and a variety of other services. We are available for residential, commercial, and industrial sewage treatment systems, including churches, restaurants, schools, industrial sites, recreational parks and centers, and other institutions. Whatever the size of the job we can be relied upon for fast, dependable service. If we can be of further assistance please contact us at 815-942-2829 or by email [info@zeiterseptics.com](mailto:info@zeiterseptics.com)
