

AQUAWORX™
by INFILTRATOR®

Put Septic System Troubles Behind You

When faced with replacing your septic system, the common solution can take a lot of time and result in costly damage to your landscaping. Simply insert the Remediator into the septic tank and in as little as two weeks, the system is restored.

The Benefits of an Aquaworx Remediator™

- Eliminates the need for a complete drainfield replacement.
- Minimal landscape damage
- Inexpensive to have installed, operate and maintain:
The Remediator uses a 40 lpm air pump, which draws 7 amps.
The average monthly cost to run the air pump is \$2.50.
- A permanent, non-invasive environmental solution.
- More than 4,000 failing systems have been repaired successfully with this technology.
- Backed by the leader in the onsite wastewater industry's strongest performance warranty.
